Project: Brand Identity · Creative Direction · Packaging · Social Media Marketing
Key Highlight: 100K+ Instagram views in 3 days

---

01 — Project Overview

13ISU is a speciality dessert brand built around one product: Tiramisu.

The ambition was to create more than another dessert business. The brand needed a distinctive identity, an engaging digital presence and a recognisable personality that customers could connect with.

Sole Trust Media worked on bringing the brand's identity and creative communication together, helping establish its presence in the local dessert market.

Our approach combined brand thinking, visual creativity and social media marketing to create a consistent brand experience.

02 — The Challenge

Entering the food and beverage market with a speciality product requires more than simply offering something delicious.

The brand needed to capture attention, communicate its speciality and give people a reason to remember it.

The key challenges included:

- Building a recognisable identity around a single speciality product.
- Creating a distinctive brand personality.
- Making the product visually appealing through creative presentation.
- Developing consistent social media communication.
- Generating awareness and interest around the brand.
- Establishing a connection with the local audience.

The central challenge: How do we make a speciality dessert brand stand out and become memorable?

03 — The Idea Behind 13ISU

The Concept Behind the Name — 13ISU

Every memorable brand begins with an idea.

For 13ISU, the idea started with the number **13**, known as *Terah* in Hindi.

We combined this number with the letters **I-S-U** to create the distinctive name 13ISU.

The creative identity takes the concept further through typography, where the number **3 is visually interpreted as an M**, creating a unique connection between numbers and lettering.

This gives the name a distinctive visual character while keeping its connection to the dessert category.

13ISU — A name built around numbers, letters and creative thinking.

The brand's communication was built around a simple emotional idea:

"Your sweetest saviour for tough days."

Rather than positioning Tiramisu as just another dessert, the brand presented it as a little moment of happiness during a difficult day.

This became the foundation of its creative direction.

04 — Brand Identity & Visual Direction

The visual identity needed to communicate the brand's playful personality while remaining consistent across digital and physical touchpoints.

Our creative direction focused on:

- Distinctive brand typography.
- A recognisable logo treatment.
- A lavender and purple visual direction.
- Dessert-focused visual communication.
- Consistent promotional layouts.
- A youthful and approachable brand personality.

The objective was to make the brand recognisable even before customers read its name.

05 — Creative Strategy

We approached the project through four connected areas.

A. Brand Building

We focused on the brand name, personality, positioning and visual direction to establish a consistent foundation.

B. Product Presentation

Tiramisu was the centre of the brand experience. The creative direction focused on presenting the product in an attractive and appetising way.

C. Social Media Communication

We developed promotional creatives and content concepts to communicate the product, introduce the brand and encourage audience interest.

D. Digital Visibility

We used Instagram as a key platform for brand communication, focusing on content that could attract attention and increase visibility.

06 — Creative Execution

Brand Communication

We developed creative messaging to introduce the brand and communicate its identity.

Promotional Campaigns

Opening announcements and product-led promotional creatives helped introduce 13MISU to its audience.

Social Media Creatives

We worked on visual content including:

- Opening announcement designs.
- Product promotional posts.
- Brand introduction creatives.
- Dessert-focused visual content.
- Occasion-based promotional communication.

Content Direction

The content approach included product presentation and customer-facing video content to make the brand feel more engaging and relatable.

07 — The Digital Marketing Result

100K+ VIEWS IN JUST 3 DAYS

One of the standout highlights of the project was the Instagram performance.

The 13ISU Instagram account achieved **over 100,000 views within three days**, based on the account dashboard shared with STM.

This created significant early digital visibility for the brand and demonstrated the value of creative content and consistent brand communication.

Platform: Instagram
Reported performance: 100K+ views
Time period: 3 days

Views are not the same as unique reach, conversions or sales. No additional performance metrics are claimed.

08 — The Brand Experience

The goal was to make every customer-facing interaction feel connected to the same brand.

From the visual identity to promotional communication, the creative direction aimed to create consistency across the brand's digital presence and customer experience.

The result was a unified creative foundation that 13MISU could continue building upon.

09 — Services & Deliverables

Service	Project contribution
Brand concept	Naming and positioning direction
Brand identity	Visual identity development
Creative direction	Brand visual language
Packaging design	Packaging concepts and presentation
Social media creatives	Promotional communication
Content direction	Product-focused storytelling
Digital marketing	Instagram visibility

10 — Project Impact

The project brought brand identity and marketing communication together under one creative direction.

Key highlights:

- A distinctive brand concept.
- A consistent visual direction.
- Product-focused creative communication.
- A recognisable social media presence.
- 100K+ Instagram views within three days.

The project established a creative foundation for the brand and helped increase its early digital visibility.

11 — Behind the Work

A brand is not built through a logo alone.

It is built through the way people see it, experience it and remember it.

With 13ISU, our focus was to bring together brand thinking, creative execution and digital communication to create a distinctive dessert brand experience.

NOT JUST SEEN. REMEMBERED.

Have a business worth building?

Let's create a brand people remember.
